DICKIES
WORKWEAR**

MADE FOR CHANGE

WE ARE EXCITED TO INTRODUCE OUR NEW MADE FOR CHANGE STRATEGY.

AT VF, WE CREATE VALUE BY MAKING CHANGE HAPPEN. WHEN WE TURN RAW COTTON INTO FABRIC, FABRIC INTO CLOTHING, CLOTHING INTO A BRAND, WE CREATE VALUE.

But the most valuable change lies ahead. Our opportunity now is to create new value and positive impact by changing our business and the apparel and footwear industry itself. The change we seek is both transformational and valuable. We believe there is more value in circular business models than in linear ones. We know that there is more value in respecting human rights than ignoring them. That there is more value in protecting the environment than destroying it. And that there is more value in being driven by a passion that inspires associates, customers and society than being driven solely by profit.

By combining the discipline and capabilities of our business mindset with the science-based targets that sustainability demands, we can lead the change the industry needs. We can create a sustainable future and ensure the apparel and footwear industry realizes its full potential as a force for good. The changes we make will define the future of our business and our industry because there is no limit on the market for making the world a better place, or for brands and products that make life better for people.

“MADE FOR CHANGE, VF’S NEW SUSTAINABILITY & RESPONSIBILITY STRATEGY, IS THE UNDERPINNING OF OUR CURRENT ACTIONS AND FUTURE ASPIRATIONS. IT DETAILS HOW WE ARE FUSING OUR FOCUS ON GROWTH, VALUE CREATION AND INNOVATION WITH OUR STEADFAST COMMITMENT TO LEAD OUR INDUSTRY INTO A MORE SUSTAINABLE FUTURE.”

Steve Rendle
Chairman, President & CEO
VF Corporation

2014-2017 S&R IMPACTS

14 OF 33

VF'S SUSTAINABILITY + RESPONSIBILITY STRATEGY

» To drive transformative solutions that make VF's business and the lives we touch better

2030 GOAL

LEAD LARGE-SCALE COMMERCIALIZATION OF CIRCULAR BUSINESS MODELS THROUGH BRAND-LED RECOMMERCE AND RENTAL INITIATIVES

CIRCULAR BUSINESS MODELS

ASPIRATION
Transform the apparel & footwear industry from linear to circular

RENTAL
Offer short term product use via rental and subscription

DESIGNED FOR CIRCULARITY
Design for longevity and multiple purposes

RECOMMERCE
Resell lightly used products

2030 GOALS

HALVE OUR ENVIRONMENTAL IMPACT, FARM-TO-FRONT-DOOR
IMPROVE THE LIVES OF 1M WORKERS AND LOCAL COMMUNITY MEMBERS IN OUR SUPPLY CHAIN

SCALE FOR GOOD

ASPIRATION
Transform our industry's three biggest impacts - climate change, materials and worker well-being

MATERIALS
Dramatically reduce the impact of our key materials

WORKER WELL-BEING
Ensure that no worker has to risk their dignity, health or life to work in the apparel supply chain

CLIMATE CHANGE
Decarbonize our value chain in line with climate science

2030 GOALS

EVERY VF ASSOCIATE HAS THE OPPORTUNITY TO CONTRIBUTE TO THEIR LOCAL COMMUNITIES
EMPOWER OUR CONSUMERS TO LIVE MORE ACTIVE AND SUSTAINABLE LIVES

MOVEMENT MAKERS

ASPIRATION
Transform how we engage our associates and consumers to be movement makers

PURPOSEFUL BRANDS
Engage our consumers to catalyze a global movement of active and sustainable lifestyles

PURPOSEFUL WORK
Empower our associates to make a positive impact by pursuing their passions

PURPOSEFUL INTERVENTIONS
Remove the barriers that prevent people from living active and sustainable lifestyles

KEY GOALS

100% of all down is sourced in accordance with RDS by 2019

100% of all footwear leather will be finished in LWG-audited tanneries by 2021

100% PFC-free outdoor apparel by 2025

50% of nylon and polyester will come from recycled materials by 2025

1,000,000 associate volunteer hours amassed by 2025

100% renewable energy in owned and operated facilities by 2025

Gender parity in leadership positions by 2030

MEET THE MAKERS AND THE SHAPERS

Led by an independent spirit, they express their identity through what they do and their passion for creating things of value. Makers pride themselves on being the best that they can be. They are driven by their confidence, creativity and commitment to their craft. Since 1922, Dickies Workwear has stood alongside generations of proud workers, equipping them with the tough, durable workwear that has enabled them to make and shape our world.

KNIFEMAKER

ROB
STONEMASON

TRUSTED.

As the global leader in performance workwear, 96 % of European workers recognize the Dickies brand for quality, durability, and value.

INNOVATIVE FEATURES.

Unique fabrics, features, and fits that will improve your comfort and performance.

DURABILITY.

Garments that work as hard as you do. Dickies Workwear garments last longer and retain their color better than any other workwear on the market.

IMAGE.

Uniquely designed for today's workforce, Dickies Workwear garments look as great as they perform.

SATISFACTION GUARANTEED.

Since 1922, Dickies quality has been built into every product. We will gladly replace a garment if you are not satisfied for any reason.

THE POWER OF THE DICKIES BRAND

Dickies is the leading global brand of innovative and trusted workwear. We have a proud heritage of providing tough, quality apparel to workers for 98 years. In that time, Dickies has evolved from a bib overall to both a full range of performance workwear and a world-class consumer brand.

The Dickies customer service exemplifies our commitment to meeting the demands of today's workforce. By maintaining deep inventories of our best-selling items and providing quick delivery. Embraced by workers everywhere, Dickies Workwear is defined by the people who wear our products.

OUR PURPOSE:

WE CHAMPION THE DIGNITY OF WORK
AND INSTILL CONFIDENCE IN THE
MAKERS AND SHAPERS OF OUR WORLD.

GDT

GDT PREMIUM

The popular GDT collection is a smart and functional cotton based workwear range. Available in lightweight 210g/m² and regular 290g/m² fabric weights as well as GDT Premium options the Dickies GDT range is durable and fashionable professional workwear.

DICKIES PROTM WORKWEAR

The Dickies PRO range is premium workwear that offers superb ergonomic fit along with exceptional comfort and breathability. Over 18 months of product development have gone into producing the Dickies PRO range making Dickies PRO our most advanced range of products to date.

HARD WORKING SINCE 1922

The Hard Working Since 1922 range gives you a more contemporary look without compromising on durability and comfort. The collection includes a range of t-shirts, sweatshirts and puffer jackets featuring traditional Dickies branding that means the Dickies Hard Working Since 1922 range can be worn in your leisure time as well as work time.

EVERYDAY WORKWEAR

The Dickies Everyday Range is the go-to range for style, comfort, durability, and value. The Everyday 24/7 range includes jackets, trousers, body warmers, shorts & matching two tone tops. ED24/7 products also come in a variety of colour options.

EMBROIDERY PRINTING SERVICES

Embroidery & printing is one of the first enhancements most customers look at when considering customising of Dickies Workwear apparel. A logo announces to the world who you represent, and a strong first impression can make a big difference in business. Dickies Embroidery and Printing Service can add logos or specified text to the vast majority of our product range. All you need to do is to contact us with your details and allow us to do the rest.

We will require the following:

- ✂ Your company name and/or account number and contact details.
- ✂ The logo details with preferably a JPG or BMP image file if possible.
- ✂ Any specific Pantone colours that you wish us to adhere to.
- ✂ The products and colours that you would like to embellish.
- ✂ The position of the logo(s) e.g. left breast area, back etc.
- ✂ The number of embellishments you require.

TIPS TO REDUCE YOUR CARBON FOOTPRINT AND ENSURE GARMENT DURABILITY

GUARANTEE THE DURABILITY OF YOUR CLOTHES:

- Always read the washing labels on your clothes.
- The washing symbol on a garment indicates the maximum temperature not to be exceeded, not the temperature you should use to wash it.
- Washing at 30°C or 40°C will help your clothing retain colour and the textile should experience less wear.
- Washing at 60°C is only necessary for extremely dirty garments (sportswear, tea towels, etc.).
- Air drying is recommended for longer garment life.
- Machine pre-washing can damage clothing fibres. In the case of stained clothes, manually pre-treat the garment before washing.
- Choosing a good laundry can also help to reduce environmental impact and keep your clothes in better shape.

REDUCE YOUR CARBON FOOTPRINT:

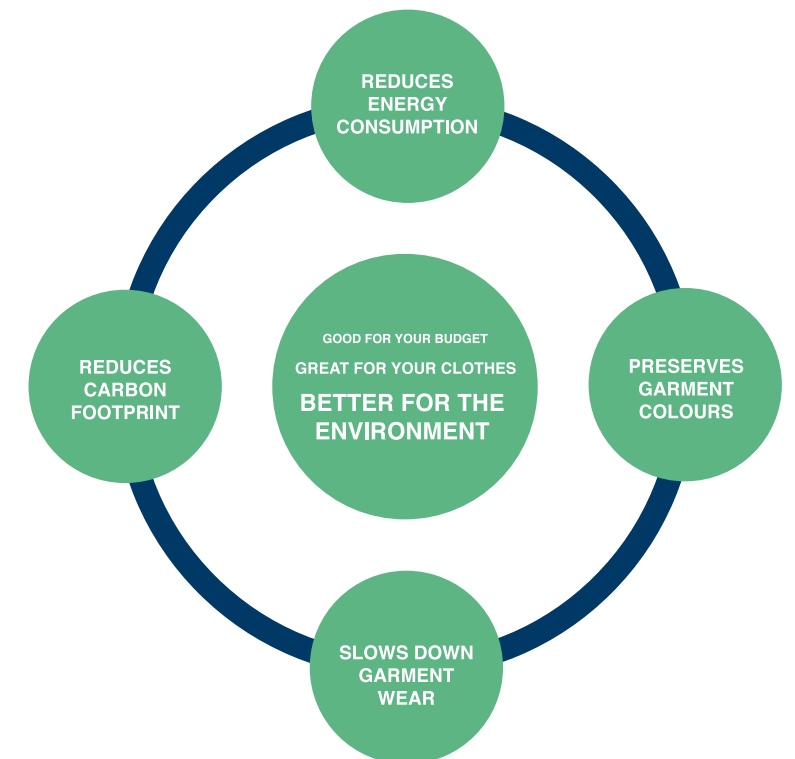

Wash at lower temperatures when possible:

Washing clothes at 60°C consumes 1.3kWh; 40°C consumes 0.7sWh; and 30°C consumes around 0.4kWh - three times less energy.

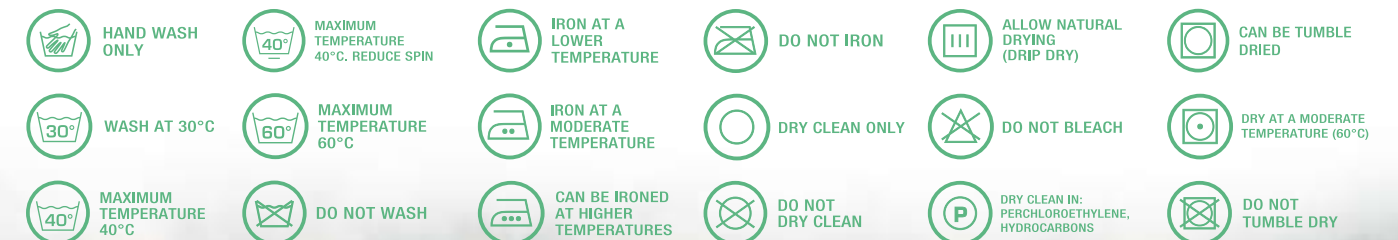

Reduce usage of tumble dryers:

For clothing washed at 40°C and dried in the open air, the CO₂ release is 0.7kg where it is 2.4kg if the laundry is dried in a dryer.

WASHING AT LOWER TEMPERATURES - RESPONSIBLE AND SUSTAINABLE:

COMMON WASHING INSTRUCTIONS:

SOLE TECHNOLOGY

1

OUTSOLE

Bonded to the midsole, the outsole provides grip and stability during walking and protects against wear and tear.

Can be moulded in a variety of materials.

2

MIDSOLE

A layer of moulded light weight material which provides shock absorption at heel strike and propulsion at launch during the walking cycle.

3

ANTI-PENETRATION INSERT

A metal or composite insert which prevents puncture from sharp objects through the bottom of the footwear.

4

FOAM FILLER

Fills the cavity created by the welt and provides additional underfoot comfort.

5

WELT / STITCHING

A strip of material that joins the upper to the sole. A strong thread attaching the welt to the midsole.

6

INSOLE

An internal component that the upper and welt are stitched to, forming the upper part of the shoe before the sole is attached.

7

INSOCK

A layer of cushioning material that sits inside the shoe, to provide underfoot comfort. Sometimes removable.

8

TOE-CAP

A metal or composite material, this protects the wearers toes as well as helping to maintain the structure of the footwear.

DTW SOLE TECHNOLOGY WELTED

DTI SOLE TECHNOLOGY INJECTED

DTC SOLE TECHNOLOGY CEMENTED

WHAT IS PU?

Polyurethane is a combination of Polyols & Isocyanates. When mixed together during the moulding process, a chemical reaction occurs and the Isocyanates cause the Polyols to expand and fill the sole mould.

The rate of expansion can be controlled. The more Isocyanate added, the quicker the expansion occurs, increasing the amount of air in the material. This can make the soles softer and more flexible, but also weaker. It is therefore important that the correct density of compound is used and a good balance between hardness and strength is achieved.

WHAT IS EVA?

Ethylene-Vinyl Acetate is an elastic co-polymer very similar to rubber used in many industrial applications. EVA is formed by expanding plastic and trapping pockets of air in various densities. It resists cracking and hardening and offers good cushioning and rebound qualities. EVA is also UV resistant and stays flexible at low temperatures, making it ideal for outdoor footwear.

It is considered environmentally friendly as chlorine is not used in its production. EVA is also easily recycled into everyday products.

FOOTWEAR

Safety Classifications & Symbol Guide

Safety footwear standard EN345 is being superseded by EN ISO 20345. Any footwear that has been tested to EN345 can continue to be sold, however any new designs will have to be tested to the new standard.

Which standard your footwear is tested to is identified on the product information label, this is found within the boot or shoe.

SB-P

Toe protection tested with 200 joules impact and 15kN compression force.
'P' refers to penetration resistance outsole.

S1

As SB, plus:
→ Closed seat region (fully enclosed heel)
→ Anti-static properties
→ Energy absorption of seat region
→ Resistance to fuel and oil

COVERALLS, FR &
BIB AND BRACES

COVERALLS, FR & BIB AND BRACES

Our iconic coveralls are some of our most popular items, and it's easy to see why. Highly durable, with an abundance of features including multiple pockets, fasteners and an elasticated back, it's the ultimate in workwear. We also offer flame retardant and hi-vis options as well as bib and brace dungarees.

All Dickies flame retardant products are certified and tested by BTGT™. With almost a century's experience in textiles and related products, BTGT™ is the leading independent organisation for the testing & certification of Personal Protective Equipment and Construction Products.

FLAME RETARDANT COVERALLS

HEAT AND FLAME PROTECTION GUIDE

Made to Order (MTO)

Our Made to Order (MTO) products are available for quantities greater than 500 pieces. In addition to our catalogue MTO's customer bespoke products can also be designed and produced for corporate clients.

EN ISO 11612

Protective clothing for workers exposed to heat and flames (not including Welders and Fire Fighters). The standard specifies the performance requirements for garments which protect the body from heat and flame.

EN ISO 11611

Protective clothing for use in welding and allied processes.

The standard specifies 2 classes with specific performance requirements:
Class 1 lower level: less hazardous welding situations.
Class 2 higher level: more hazardous welding situations.

EN 1149-5

Protective clothing - electrostatic properties. Antistatic PPE are certified to EN 1149-5:2008 as this standard covers the performance requirements and refers to the choice of 2 different test methods (EN 1149-1 or EN 1149-3).

EN ISO 13758-2:2003 (UPF 40+)

Textiles - Solar UV protective properties. Describes the classification and marking of sun-protective clothing. An Ultraviolet Protection Factor (UPF) shows how much solar ultraviolet radiation (UVR) is reduced when passing through fabric of clothing. It is similar to the sun protection factor (SPF) used for sunscreens.

Suitable for industrial laundry at 75°C

Suitable for domestic laundry

GENERAL

A user guide is included with all our garments. We recommend that this be read carefully as the guide gives important information about the protection the garment provides along with wash care instructions and important information that contributes to optimal protection for the wearer. Jacket and Trousers should always be worn together as an ensemble to ensure maximum protection. ISO standards are under constant revision and our designs are regularly revised and updated to ensure compliance to the latest standards. Dickies also manufacture garments to comply with many different International Safety Standard requirements such as NFPA and others upon request. Most of our garments can be customised with your corporate badges and logo's. We can also accommodate requirements for bespoke customised garment design requests from our larger customers ensuring a unique corporate identity. Please contact us for more details.

PYROVATEX®

Cotton fibres treated with a crosslink resin utilising the heat-cured dialkylphosphonamide process that forms a bond on the molecular level to the cellulose in the cotton fibres. This creates a very strong, durable and protective link that makes the fabric resistant to shrinking or melting when exposed to heat and flame. Our Pyrovatex® fabrics are made from high quality cotton fibres, consequently they are lightweight and comfortable with excellent durability to wash and wear, ensuring Dickies Workwear a long lifetime.

LAUNDRY CARE

Flame retardant clothing should be laundered strictly in adherence with the instructions on the care label in every garment, if in any doubt please consult with Dickies as to how to best care for your workwear. Poor laundry care can have a serious adverse effect on a safety garment. For example water which is too hard affects the cleaning process and may contain mineral salts to build up on the fabric, deposits of this type can adversely affect the FR properties of the clothing and in extreme cases of build-up can actually exacerbate the flammability of the clothing and act as an accelerant if exposed to an ignition source. cotton, Aramid and Modacrylic garments can be laundered using the recommended temperatures and wash cycles. Some 3% minimal shrinkage can be expected and is a natural reaction from both the fibres and the weave construction, most noticeable during the first 3 to 5 washes. Please be careful not to "over dry" garments. Dickies recommend that this is taken into consideration when selecting your preferred garment. Exposure to excessive drying temperatures will result in higher than normal shrinkage. Starches, fabric softeners, and other laundry additives should be avoided. DO NOT USE CHLORINE BLEACH OR OTHER DETERGENTS OR CHEMICALS CONTAINING HYDROGEN PEROXIDE.

HI-VIS

HIGH VISIBILITY

High visibility (Hi-Vis) clothing and workwear is a key area for Dickies in the UK. Conformity to EN471 British Standard is a must. Of course, our range includes hi-vis jackets, trousers, the classic high visibility vest & much more...

EN ISO 20471:2013

The following pictogram placed on a garment indicates adherence to the EN ISO 20471 standard.

X

X Classification of the applied surface of fluorescent and retro reflective material Classes 1 to 3 (of which class 3 is the highest achievable class)

EN ISO 20471 classification of fluorescent and retroreflective surface (X)

	CLASS 1	CLASS 2	CLASS 3
Fluorescent material	0,14m²	0,50m²	0,80m²
Reflective tape	0,10m²	0,13m²	0,20m²

EN 343

Protection against rain

X

Y

Resistance to water penetration and water vapour resistance are the two main properties which are tested in EN 343.

The following parameters are used:

X Resistance to water penetration (3 levels of which 3 is the highest achievable class).

Y Water vapour resistance - Breathing properties (3 levels of which 3 is the highest achievable class).

RIS-3279-TOM

The Railway Group Standard G0/RT 3279 has been updated, and replaced by The Rail Industry Standard: RIS-3279-TOM.

*As there are no technical changes to the standard, all Dickies garments that are certified to G0/RT 3279 will be automatically compliant to the new RIS-3279-TOM standard.

EN ISO 13758 - 2:2003 (UPF +40)

Textiles - Solar UV protective properties

Describes the classification and marking of sun-protective clothing. An Ultraviolet Protection Factor (UPF) shows how much solar ultraviolet radiation (UVR) is reduced when passing through clothing fabric. It is similar to the sun protection factor (SPF) used for sunscreen.

EN ISO 13688:2013

Protective Clothing - General requirements

ISO 13688:2013 specifies general performance requirements for ergonomics, innocuousness, size designation, aging, compatibility and marking of protective clothing and the information to be supplied by the manufacturer with the protective clothing.

Only to be used in combination with other standards containing requirements for specific protective performance and not on a stand-alone basis.

HIGH VISIBILITY

Having the right hi-vis gear is essential. Our entire range conforms to the required EN471 British Standard. And it includes just about everything you could possibly require - including safety waistcoats, hoodies, T-shirts, jackets and trousers. There's plenty of waterproof options too.

All calculations are approximate. For the exact conversion:
Multiply centimetres by 0.394 to give inches.
Multiply inches by 2.54 to give centimetres.

Please note colours of products are represented as accurately as possible.
Our policy is one of continuous improvement and we reserve the right to
change product specifications without notice.
